Promises are only good as indication of what may be done. It is fulfilment that the public wants. The bill directing that the tunnel be ventilated and lighted was delayed in the Assembly yesterday by the contingent favorable to the New York Central road. Mr. DEPEW may here show his honesty of purpose, and reinforce his " intentions" by throwing his infinence in doing away with this opposition.

If the New York Central Railroad wants legislative authority for the changes necessary to make safe its tunnel, let urge the passage of this bill, which is sensible, moderate and absolutely fair.

IS IT REALLY IT?

The present flerce pursuit of the microbs as the corner-stone of every disease make it perfectly in order that a Chicago dector should have gone on a burning onest for the microbic malefactor of the grip. But it is rather startling to be told that this wily tangler-up of our mucous membranis a dweller in the "star-dust." Dr. GESTEY declares, however, that this is its habitat. It was the episodic character of the grip

appearance which led the Doctor to whisk a blank slide through this "star-dust, which fills certain stretches of space only in the hope of trapping the marauder. To his delight, he secured several robust little wrigglers unknown to science. Examina tion of the mucus of a gripped pattern found the microbes in it identical with the " star-dust " aliens.
